# B.C.A

# SYLLABUS FOR ALAGAPPA UNIVERSITY AFFILIATED COLLEGES

FROM THE ACADEMIC YEAR - 2023 - 2024

By

TAMILNADU STATE COUNCIL FOR HIGHER EDUCATION, CHENNAI – 600 005

# **ALAGAPPA UNIVERSITY**

(A State University Accredited with "A+" Grade by NAAC (CGPA: 3.64) in the third Cycle and Graded as Category-I University by MHRD-UGC) KARAIKUDI - 630 003, TAMIL NADU.

## Introduction

## **BCA** (Bachelor of Computer Application)

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Application is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer Application is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically every one is a computer user, and many people are even computer programmers. Computer Application can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer Application also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer Application has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Application is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software. Programme Outcome, Programme Specific Outcome and Course Outcome

Computer Application is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. The key core areas of study in Mathematics include Algebra, Analysis (Real & Complex), Differential Equations, Geometry, and Mechanics.

The Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

#### 1. Programme Outcomes (PO) of BCA

- > Scientific aptitude will be developed in Students
- > Students will acquire basic Practical skills & Technical knowledge along with domain knowledge of different subjects in the Computer Science & humanities stream.
- > Students will become employable; Students will be eligible for career opportunities in education field, Industry, or will be able to opt for entrepreneurship.
- > Students will possess basic subject knowledge required for higher studies, professional and applied courses.
- > Students will be aware of and able to develop solution oriented approach towards various Social and Environmental issues.
- Ability to acquire in-depth knowledge of several branches of Computer Science and aligned areas. This Programme helps learners in building a solid foundation for higher studies in Computer Science and applications.
- > The skills and knowledge gained leads to proficiency in analytical reasoning, which can be utilized in modeling and solving real life problems.
- ➤ Utilize computer programming skills to solve theoretical and applied problems by critical understanding, analysis and synthesis.
- > To recognize patterns and to identify essential and relevant aspects of problems.
- ➤ Ability to share ideas and insights while seeking and benefitting from knowledge and insight of others.
- Mold the students in to responsible citizens in a rapidly changing interdependent society. The above expectations generally can be pooled into 6 broad categories and can be modified according to institutional requirements:

PO1: Knowledge

PO2: Problem Analysis

PO3: Design/Development of Solutions

PO4: Conduct investigations of complex problems

PO5: Modern tool usage PO6: Applying to society

#### 2. Programme Specific Outcomes of B.Sc. Degree Programme in Computer Science

PSO1: Think in a critical and logical based manner

PSO2:Familiarizethestudents with suitable software tools of computer science and industrial applications to handle issues and solve problems in mathematics or statistics and real time application related sciences.

PSO3: Know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.

PSO4: Understand, formulate, develop programming model with logical approaches to an Address issues arising in social science, business and other contexts.

PSO5: Acquire good knowledge and understanding to solve specific theoretical and applied problems in advanced areas of Computer science and Industrial statistics.

PO6: Provide students / learners sufficient knowledge and skills enabling them to undertake further studies in Computer Science or Applications or Information Technology and its allied areas on multiple disciplines linked with Computer Science.

PO7: Equip with Computer science technical ability, problem solving skills, creative talent and power of communication necessary for various forms of employment.

PO8: Develop a range of generic skills helpful in employment, internships & societal activities.

PO9:Get adequate exposure to global and local concerns that provides platform for further exploration into multi-dimensional aspects of computing sciences. Mapping of Course Learning Outcomes (CLOs) with Programme Outcomes (POs) and Programme Specific Outcomes (PSOs) can be carried out accordingly, assigning the appropriate level in the grids: (put tick mark in each row)

PO/PSO	PSO <sub>1</sub>	PSO2	PSO3	PSO4	PSO5	PSO <sub>6</sub>

PO4				✓		
PO5					✓	
PO6						✓

#### 3. Highlights of the Revamped Curriculum

- > Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the corecomponents and incorporating application or iented content where verrequired.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry/real
- Life situations. The curriculum so facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- ➤ The General Studies and Computer Science based problem solving skills are included as mandatory components in the Training for Competitive Examinations course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- ➤ The Internship during the second year vacation will help the students gain valuable work experience that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- ➤ Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- ➤ State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and interdisciplinary nature are incorporated as Elective courses, covering conventional topics to the latest Statistics with R Programming, Data Science, Machine learning. Internet of Things and Artificial Intelligence etc..

# 4. Value additions in the Revamped Curriculum:

Semester	Newly introduced	Outcome/Benefits
	Components	
I	Foundation Course	In still confidence among students
	To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning abstract Mathematics and simulating mathematical	• Create interest for the subject

#### **Practical Subjects:**

The following list of parameters is considered for the evaluation of practical examination.

Total Marks: 100 (Internal: 25 marks, External: 75 Marks)

### **For Internal Marks:**

i. Internal test : 20 ii. Record Work : 5

Total : 25

#### For External Marks:

i. Aim, Procedure / Algorithm and Program: 15ii. Coding and Compilation: 20iii. Debugging: 20iv. Results: 20

Total : 75

----

#### Annexure I

## Suggested topics in Core component

- 1. Microprocessor and Microcontroller
- 2. Microprocessor and Microcontroller Lab
- 3. RDBMS with PL/SQL
- 4. PL/SQL Lab
- 5. Software Engineering
- 6. Machine Learning
- 7. Machine Learning Lab
- 8. Network Security
- 9. Data Mining and Warehousing
- 10. Mobile Application Development
- 11. Mobile Application Development Lab
- 12. Introduction to Data Science and more.

## **Suggested topics in Elective Course**

#### **Generic Specific**

- 1. Discrete Mathematics-I
- 2. Discrete Mathematics-II
- 3. Statistical Methods and its Application-I
- 4. Statistical Methods and its Application-II
- 5. Optimization Techniques
- 6. Nano Technology
- 7. Introduction to Linear Algebra
- 8. Graph Theory and its Application
- 9. Financial Accounting
- 10. Cost and Management Accounting
- 11. Digital Logic Fundamentals
- 12. Numerical Methods
- 13. Resource Management Techniques and more.

#### Elective course—(EC1-EC8)-Discipline Specific

- 1. Software Metrics
- 2. Natural Language Processing
- 3. Analytics for Service Industry
- 4. Cryptography
- 5. Database Management System
- 6. Big Data Analytics
- 7. IOT and its Applications
- 8. Software Project Management
- 9. Image Processing
- 10. Information Security
- 11. Human Computer Interaction
- 12. Fuzzy Logic
- 13. Artificial Intelligence
- 14. Mobile Adhoc Network
- 15. Computational Intelligence
- 16. Grid Computing
- 17. Cloud Computing
- 18. Artificial Neural Network
- 19. Agile Project Management and more..

[Pl.Note:InSemester-VI-ForEC7andEC8subjects Instructionalhoursmaybeusedas:5per cycle]

#### Annexure II

## Suggested topics in Skill Enhancement (SEC 1-SEC 8) Course

#### **Skill Enhancement Course**

- 1. Fundamentals of Information Technology
- 2. Introduction to HTML
- 3. Web Designing
- 4. PHP Programming
- 5. Software Testing
- 6. Problem Solving Techniques
- 7. Understanding Internet
- 8. Office Automation
- 9. Quantitative Aptitude
- 10. Open Source Technologies
- 11. Multimedia Systems
- 12. Advanced Excel
- 13. Biometrics
- 14. Cyber Forensics
- 15. Pattern Recognition
- 16. Enterprise Resource Planning
- 17. Robotics and Applications
- 18. Simulation and Modeling
- 19. Organization Behavior and more.

	PROGRAMMING									
	LAB									

### **Course Objectives:**

- 1. Be able to design and program Python applications.
- 2. Be able to create loops and decision statements in Python.
- 3. Be able to work with functions and pass arguments in Python.
- 4. Be able to build and package Python modules for reusability.
- 5. Be able to read and write files in Python.

	2. Be do to read that write mes in rython.	
	LAB EXERCISES	Required Hours
	1. Program using variables, constants, I/O statements in Python.	60
	2. Program using Operators in Python.	
	3. Program using Conditional Statements.	
	4. Program using Loops.	
	5. Program using Jump Statements.	
	6. Program using Functions.	
	7. Program using Recursion.	
	8. Program using Arrays.	
	9. Program using Strings.	
	10. Program using Modules.	
	11. Program using Lists.	
	12. Program using Tuples.	
	13. Program using Dictionaries.	
	14. Program for File Handling.	
	Course Outcomes	
	On completion of this course, students will	
CO1	Demonstrate the understanding of syntax and semantics of	
CO2	Identify the problem and solve using PYTHON programming technique	es.
CO3	Identify suitable programming constructs for problem solving.	
CO4	Analyze various concepts of PYTHON language to solve the proble	em in an efficient way.
CO5	Develop a PYTHON program for a given problem and test for its co	orrectness.

## **Mapping with Programme Outcomes:**

	Course Outcomes	
CO	On completion of this course, students will;	
CO1	To understand the basic concepts and the functionality of the Biometrics, Face Biometrics, Types, Architecture and Applications.	PO1,PO3, PO6, PO8
CO2	To know the concepts Retina and Iris Biometrics and Vein and Fingerprint Biometrics.	PO1, PO2, PO3, PO6
CO3	To analyse the Privacy Enhancement and Multimodal Biometrics.	PO3, PO5
CO4	To get analytical idea on Watermarking Techniques	PO1, PO2, PO3, PO7
CO5	To Gain knowledge on Future scope of Biometrics, and Study of various Biometric Techniques.	PO2, PO6, PO7

						jecti						
LO1	To identify and un C# language.								ork and	ASP .NET	Γwith	
LO2	To develop ASP .N	NET Web app	licat	ion ı	ısing	stano	dard control	S.				
LO3	To implement file	o implement file handling operations.										
LO4	To handles SQL S	o handles SQL Server Database using ADO .NET.										
LO5	Understand the G	rid view con	trol a	nd 2	XML	clas	ses.					
UNIT		Details										
UNIT I	Overview of .NET framework: Common Language Runtime (CLR), Framework											
	Class Library – C# Fundamentals: Primitive types and Variables – Operators –											
	Conditional statements – Looping statements – Creating and											
	Using Objects-Arrays-String operations.											
UNIT II	Introduction to ASP .NET – IDE – Languages supported Components-Working										15	
	with Web Forms – Web form standard controls: Properties and its events – HTML											
	Controls – List Controls: Properties and its events.											
UNIT III	Rich Controls: Pro	operties and	its ev	ent	s–val	lidati	on controls	: Properti	es and it	ts		
	events– File Strea	m classes -F	ile M	Iode	s – F	ile S	hare – Rea	ding and	Writing	to files	15	
	-Creating, Moving, Copying and Deleting files -File uploading.											
UNIT IV	ADO .NET Overv	view – Datab	ase (	Coni	necti	ons–(	Commands	–Data Re	ader – I	Data	15	
	Adapter – Data Se	ets –Data Co	ntrol	s an	d Its	Prop	erties – Da	ta Binding	g			
UNIT V	Grid View control: Deleting, editing, Sorting and Paging. XML classes—Web form										15	
	to manipulate XML files-Website Security-Authentication - Authorization-Creating											
	Web application.											
										Total	75	

	Course Outcomes	Programme Outcome
CO	On completion of this course, students will	
1	Develop working knowledge of C# programming constructs and the .NET Framework	PO1, PO2, PO6
2	To develop a software to solve real-world problems using ASP .NET	PO2, PO3, PO8
3	To Work On Various Controls Files	PO1, PO3, PO7
4	To create a web application using Microsoft ADO .NET.	PO2, PO6
5	To develop web applications using XML	PO1, PO3, PO8
