## **INTRODUCTION**

### **B.Sc., INFORMATION TECHNOLOGY**

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Information Technology is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Information Technology is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. Information Technology can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of Information Technology also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Information Technology / Computer Science has a wider range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Information Technology / Computer Science is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

The Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

REGULATIONS FOR UNDER GRADUATE PROGRAMME**

<b>Programme:</b>	<b>B.Sc.INFORMATIONTECHNOLOGY</b>
<b>ProgrammeCode:</b>	<b>129</b>
<b>Duration:</b>	<b>3years[UG]</b>
<b>Programme Outcomes:</b>	<p><b>PO1: Disciplinary knowledge:</b> Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study</p> <p><b>PO2: Communication Skills:</b> Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.</p> <p><b>PO3: Critical thinking:</b> Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.</p> <p><b>PO4: Problem solving:</b> Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.</p> <p><b>PO5: Analytical reasoning:</b> Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints.</p> <p><b>PO6: Research-related skills:</b> A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesising and articulating; Ability to recognise cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation.</p> <p><b>PO7: Cooperation/Team work:</b> Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or team in the interests of a common cause and work efficiently as a member of a team.</p>

**PO8: Scientific reasoning:** Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.

**PO9: Reflective thinking:** Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society.

**PO10 Information/digital literacy:** Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.

**PO 11 Self-directed learning:** Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

**PO12 Multicultural competence:** Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.

**PO 13: Moral and ethical awareness/reasoning:** Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one's work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.

**PO 14: Leadership readiness/qualities:** Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.

**PO15:Lifelong learning:** Ability to acquire knowledge and skills, including „learning how to learn“, that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.

<b>Programme Specific Outcomes:</b>	
<b>PSO1</b>	Demonstrate and apply basic knowledge of information technology to the scientific issues and problems being faced in society and the industry.
<b>PSO2</b>	Analyze critical problems and provide computer-based solutions by applying appropriate tools and technology.
<b>PSO3</b>	Equip with technical ability, problem solving skills, creative talent and power of communication necessary for various forms of employment. Develop a range of generic skills helpful in employment, internships & societal activities.
<b>PSO4</b>	Graduates will possess the skills to effectively plan, execute, and manage IT projects from initiation to completion. They will be proficient in project management methodologies.
<b>PSO5</b>	Bachelor of Information Technology gives a number of opportunities like software programmer, system and network administrator, web designer, Researcher/faculty for Information Technology, computer science and computer applications/etc.

## **HighlightsoftheRevampedCurriculum:**

- Student-centric, meeting the demands of industry & society, incorporating industrial components,hands-on training, skillenhancementmodules,industrialproject,projectwith viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientificfront, advancedprogrammingpackagesalliedwiththediscretelinetopics,practicaltraining,devising mathematicalmodelsandalgorithmsforprovidingsolutions toindustry/reallifesituations. The curriculum also facilitates peer learning with advanced mathematical topicsinthefinal semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the Training for Competitive Examinations' course at the final semester, a first of its kind.
- ThecurriculumisdesignedsoastostrengthentheIndustry-Academainterfaceandprovide more job opportunities for the students.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and tonarrow down and focus on the career path.
- Project with viva-voce component in the sixth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinarynatureareincorporatedasElectivecourses,coveringconventionaltopicstothe latest - Artificial Intelligence.

<b>CourseOutcomes</b>	
CO1	Outline the Computer fundamentals and various problem solving concepts in Computers
CO2	Describe the basic computer organization, software, computer languages, software development life cycle and the need of structured programming in solving a computer problem
CO3	Identify the types of computer languages, software, computer problems and examine how to set up expressions and equations to solve the problem.
CO4	Choose most appropriate programming languages, constructs and features to solve the problems in diversified domains.
CO5	Analyze the design of modules and functions in structuring the solution and various organizing tools in problem solving.

<b>LO2</b>	<ul style="list-style-type: none"> <li>• To enable the students to use AWT controls, Event Handling.</li> </ul>

**Pre requisites:** Basic knowledge about programming concepts

### **Contents**

<b>Unit I</b>	Fundamentals of Object- Oriented Programming: Introduction– Object Oriented Paradigm – Concepts of Object – Oriented Programming – Benefits of OOP – Evolution: Java History- Java Features-DiffersfromCandC++-OverviewofJavaLanguage:JavaProgram-Structure-Tokens–Java Statements–Java Virtual Machine–Command Line Arguments
<b>Unit II</b>	Constants, Variables and Data Types–Operators and Expressions–Decision making and Branching – Looping –Arrays–Strings–Collection Interfaces and classes
<b>Unit III</b>	Classes objects and methods: Introduction–Defining a class–Method Declaration–Constructors -MethodOverloading–StaticMembers–Nestingofmethods–Inheritance–Overriding– Final variables and methods – Abstract methods and classes
<b>Unit IV</b>	Multiple Inheritance: Defining Interfaces–Extending Interfaces–Implementing Interfaces– Packages: Creating Packages–Accessing Packages–Using a Package–Managing Errors and Exceptions-Multi threaded Programming
<b>Unit V</b>	AWT Controls: The AWT class hierarchy - user interface components- Labels - Button - Text - Check Box - Check Box Group - Choice - List Box - Panels – Scroll Pane - Menu - Scroll Bar. Working with Frame class - Colour - Fonts and layout managers-Handling Mouse and Keyboard Events-Graphics Class – Lines and Rectangles – Circles and Ellipses – Drawing Arcs –Drawing Polygons – Line Graphs – Using Control Loops in Applets – Drawing Bar Charts.

### Course Outcomes

CO1	Understand the basic Object-oriented concepts.
CO2	Implement the basic constructs of Core Java.
CO3	Implement Method, classes and inheritance of Core Java.
CO4	Implement Packages, Managing Errors and Exceptions, multi-threading of Core Java.
CO5	Understand and use the components of AWT and Event handling.

**LO2** To become proficient in the use of AWT, Event Handling

### **Contents**

1. Write a program to find the bigger of two numbers using command line argument.
2. Write a program to find the sum and average of N numbers using Command line argument
3. Write a mark list program to find the total, average, result and grade.
4. Write a program to prepare the EBBill calculation.
5. Write a program to find the factorial value of the given number.
6. Write a program to print the Multiplication Table.
7. Write a program to print the Fibonacci Series.
8. Write a program to find the given number is prime number or not.
9. Write a program to find the given number is perfect number or not.
10. Write a program to find the given number is Armstrong or Not.
11. Write a program to Reverse the Given Number.
12. Write a program to find the Sum of Digit.
13. Write a program to arrange the numbers in Descending order.
14. Write a program to find the Sum of each Row in the given matrix.
15. Write a program for Matrix Addition.
16. Write a program for Matrix Subtraction.
17. Write a program to perform the following string operations using String class:
  - a. String Concatenation
  - b. Search a substring
  - c. To extract a substring from given string
18. Write a program to find the given string is Palindrome or Not.
19. Write a program to Count the no of Vowels in the given string.
20. Write a program to arrange the String in Ascending order.
21. Write a program to calculate Area of Square, Rectangle using Method Overloading.

22. Write a program using Single Inheritance.
23. Write a program to handle the Exception using try and multiple catch block.
24. Write a program to generate Prime and Perfect number using thread.
25. Write a program to implement a Mark List program using package.
26. Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, \*, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.
27. Write a Java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green with radio buttons. On selecting a button, an appropriate message with “stop” or “ready” or “go” should appear above the buttons in a selected color. Initially there is no message shown.
28. Write a program to draw a human face.
29. Write a program to draw our national flag.
30. Write a program to draw a Bar-chart.

#### **Course Outcomes**

<b>CO1</b>	Use appropriate software development environment to write, compile and execute object-oriented Java programs
<b>CO2</b>	Analyze and identify necessary mechanisms of Java needed to solve real-world problem
<b>CO3</b>	Implement Inheritance, package.
<b>CO4</b>	Implement multi-threading and exception-handling.
<b>CO5</b>	Execute GUI, AWT and apply event handling.

<b>CourseObjective</b>											
C1	Understand the systematic approach to problem solving.										
C2	Know the approach and algorithms to solve specific fundamental problems.										
C3	Understand the efficient approach to solve specific factoring-related problems.										
C4	Understand the efficient array-related techniques to solve specific problems.										
C5	Understand the efficient methods to solve specific problems related to text processing. Understand how recursion works.										
<b>UNIT</b>	<b>Details</b>									<b>No.of Hours</b>	
<b>UNIT I</b>	<b>Introduction:</b> Notion of algorithms and programs – Requirements for solving problems by computer – The problem-solving aspect: Problem definition phase, Getting started on a problem, The use of specific examples, Similarities among problems, Working backwards from the solution – General problem-solving strategies - Problem solving using top-down design – Implementation of algorithms – The concept of Recursion.									6	
<b>UNIT II</b>	<b>Fundamental Algorithms:</b> Exchanging the values of two variables – Counting - Summation of a set of numbers - Factorial computation - Sine function computation - Fibonacci Series generation - Reversing the digits of an integer – Base Conversion.									6	
<b>UNIT III</b>	<b>Factoring Methods:</b> Finding the square root of a number – The smallest divisor of an integer – Greatest common divisor of two integers - Generating prime numbers – Computing the prime factors of an integer – Generation of pseudo-random numbers- Raising a number to a large power – Computing the $n$ th Fibonacci number.									6	
<b>UNIT IV</b>	<b>Array Techniques:</b> Array order reversal – Array counting or histogramming – Finding the maximum number in a set - Removal of duplicates from an ordered array - Partitioning an array – Finding the $k^{\text{th}}$ smallest element – Longest monotone subsequence.									6

2. Write a Program to design a webpage with a form that uses all types of controls.
3. Write a Program to create a page using functions for comparing three integers and print the largest number.
4. Write a function to calculate the factorial of a number (non-negative integer). The function accept the number as an argument.
5. Write a Program to convert Number into Word.
6. Write a Program to check whether the given number is prime or not.
7. Write a Program that checks whether a passed string is palindrome or not.
8. Write a Program to create a PHP page which accepts name from user. After submission that page will display good morning or good evening message along with user name based on time functions.
9. Write a Program to create a simple 'birthday countdown' script, the script will count the number of days between current day and birth day.
10. Write a program to check the email-id is valid or not using regular expression.
11. Write a Program to prepare the Mark list using File Handling.
12. Write a Program to prepare the EBBill using File Handling.

CO2	To know the need and Role of ERP in logical and Physical Integration.
CO3	Identify the important business functions provided by typical business softwares such as enterprise resource planning and customer relationship management
CO4	To train the students to develop the basic understanding of how ERP enriches the business organizations in achieving a multidimensional growth
CO5	To aim at preparing the students technological competitive and make them ready to self-upgrade with the high technical skills

UNIT	Details	No.of Hours
UNIT I	ERP Introduction, Benefits, Origin, Evolution and Structure: Conceptual Model of ERP, the Evolution of ERP, the Structure of ERP, Components and needs of ERP, ERP Vendors; Benefits & Limitations of ERP Packages.	6
UNIT II	Need to focus on Enterprise Integration/ERP; Information mapping; Role of common shared Enterprise database; System Integration, Logical vs. Physical System Integration, Benefits & limitations of System Integration, ERP's Role in Logical and Physical Integration. Business Process Reengineering, Data warehousing, Data Mining, Online Analytic Processing (OLAP), Product Life Cycle Management (PLM), LAP, Supply chain Management.	6
UNIT III	ERP Marketplace and Marketplace Dynamics: Market Overview, Market place Dynamics, the Changing ERP Market. ERP-Functional Modules: Introduction, Functional Modules of ERP Software, Integration of ERP, Supply chain and Customer Relationship Applications. Cloud and Open Source, Management, Material Management, Financial Module, CRM and Case Study.	6
UNIT IV	ERP Implementation Basics, , ERP implementation Strategy, ERP Implementation Life Cycle , Pre- Implementation task, Role of SDLC/SSAD, Object Oriented Architecture, Consultants, Vendors and Employees.	6
UNIT V	ERP & E-Commerce, Future Directives- in ERP, ERP and Internet, Critical success and failure factors, Integrating ERP into organizational culture. Using ERP tool: either SAP or ORACLE	6

	format to case study.	
	<b>Total</b>	<b>30</b>

### **CourseOutcomes**

<b>Course Outcomes</b>	On completion of this course, students will;
<b>CO1</b>	Understand the basic concepts of ERP.
<b>CO2</b>	Identify different technologies used in ERP
<b>CO3</b>	Understand and apply the concepts of ERP Manufacturing Perspective and ERP Modules
<b>CO4</b>	Discuss the benefits of ERP
<b>CO5</b>	Apply different tools used in ERP

### **Learning Objectives**

**LO1** Understand the fundamental of programming using Python, such as variables, data types, control structures, and functions.

**LO2** Learn how to use Python libraries and modules to solve problems.

#### **Prerequisites:**

#### **Contents**

1. Write a Python Program for checking whether the given number is an odd or even number.
2. Write a Python Program to check leap year.
3. Write a Python Program to Check the given number is Prime Number or not.
4. Write a Python Program to Check the given number is Perfect Number or not.
5. Write a Python program to generate list of Fibonacci number up to n numbers.
6. Write a Python program to generate multiplication table.
7. Write a Python program to print the Armstrong number between the two range.
8. Write a Python program to create, append and remove lists in python.
9. Write a program to demonstrate working with tuples in python.
10. Write a program to demonstrate working with dictionaries in python.
11. Write a Python program to define a module to find Factorial Numbers and import the module to another program.
12. Write a Python program to find the given string is Palindrome or Not
13. Write a python program by using exception handling mechanism.
14. Write a Python to Implement python script to accept line of text and find the number of characters, number of vowels and number of blank spaces in it.
15. Write a program to copy file contents from one file to another.
16. Write a program to prepare mark list using files.
17. Write a program to prepare the e-Bill using files.
18. Create a graphical application in Python Tkinter to prepare the salary bill using widgets.
19. Write a program to drawing a cartoon or house using turtle.
20. Write a program to drawing a colouring shapes using turtle.

<b>CO</b>	<b>CourseOutcomes</b>
CO1	Understand the significance of control statements, loops and functions in creating simple programs.
CO2	Interpret the core data structures available in python to store, process and sort the data.
CO3	Develop the real time applications using python programming language.
CO4	Analyze the real time problem using suitable python concepts.
CO5	Assess the GUI application using appropriate concepts in python.

<b>CO</b>	<b>CourseOutcomes</b>

CO1	Understand the fundamental concepts and principles of e-commerce, including its evolution, types, and business models.
CO2	Gain knowledge of managing e-commerce platforms, payment gateways, and security measures.
CO3	Helps to identify core concepts of marketing and the role of marketing in society.
CO4	Explore the role of digital marketing in sales for e-commerce businesses.
CO5	Gain insights into the ethical and legal considerations in e-commerce and digital marketing practices, including privacy, data protection, and regulatory compliance.

### Learning Objectives

**LO1** To understand the basic DBMS models and architecture

**LO2** To learn how to query and normalize the database.

**LO3** To study the database design, transaction Processing and Management and Security Issues.

### Prerequisites:

### Contents

<b>UnitI</b>	Introduction to Databases: Introduction – Characteristics of the Database Approach – Actors on the Scene – Workers behind the scene– Advantages of using DBMS Approach. Overview of database and Architectures: Data Models, Schemas, and Instances – Three-schema Architecture and Data Independence – Database languages&Interfaces–Database System Environment–Centralized&Client Server Architecture for DBMS-Classification of DBMS.
<b>UnitII</b>	Basic Relational Model: Relational Model Concepts – Relational Model Constraints and Relational Database Schemas – Update Operations, Tractions, Dealing with Constraint Violations – Formal Relational Languages: Unary Relational Operations: SELECT and PROJECT – Relational Algebra Operations from Set Theory–Binary Relational Operations: JOIN and DIVISION– Examples of Queries in Relational Algebra.
<b>UnitIII</b>	Conceptual Data Modeling using the ER Model: Using High-Level Conceptual Data Models for Database Design – An example DB application – Entity Types, Entity Sets, Attributes, and Keys– Relationship Types, Relationship sets, Roles, and Structural Constraints – Weak entity types – Example- Mapping a Conceptual Design into Logical Design: Relational Database Design using ER-Relational Mapping– Mapping EER Model Constructs to Relations
<b>UnitIV</b>	Functional Dependencies and Normalization for Relational Database: Functional Dependencies – Definition of Functional Dependency– Normal Forms based on Primary Keys – Normalization of Relations– First Normal Form – Second Normal Form–Third Normal Form–BCNF–Fourth Normal Form–Fifth Normal Form.
<b>UnitV</b>	PL/SQL: Introduction to PL/SQL – More on PL/SQL – Error Handling in PL/SQL – Named Exception Handlers – Stored Procedures and Functions – Execution of Procedures and Functions – Advantages – Procedures Vs. Functions – Syntax for Creating Procedures and Functions– Deleting a Stored Procedure or Function– Packages – Database Triggers – Types Of Triggers – Deleting a Trigger – Raise Application Error Procedure
<b>TOTAL</b>	<b>75 Hrs</b>

<b>CO</b>	<b>CourseOutcomes</b>
CO1	Outline the fundamental RDBMS concepts and PL/SQL
CO2	Apply database operations, mapping, normalization, SQL and PL/SQL
CO3	Analyze the requirements to implement relational database concepts
CO4	Evaluate the database based on various models and normalization.
CO5	Design and construct normalized tables and manipulate it effectively using SQL and PL/SQL database objects

### Learning Objectives

**LO1** To learn the fundamentals and essentials of Cloud Computing.

**LO2** To learn about Architecture and Application design of Cloud Computing.

### Prerequisites:

### Contents

<b>UnitI</b>	Understanding Cloud Computing: Origins and Influences – Basic Concepts And Terminology – Goals And Benefits – Risks And Challenges. Fundamental Concepts And Models: Roles And Boundaries– Cloud Characteristics – Cloud Delivery Models – Cloud Deployment Models.
<b>UnitII</b>	Cloud – Enabling Technology: Broadband Networks And Internet Architecture – Data Center Technology – Virtualization Technology – Web Technology – Multitenant Technology –Service Technology. Cloud Infrastructure Mechanisms: Logical Network Perimeter– Virtual Server – Cloud Storage Device – Cloud Usage Monitor – Resource Replication – Readymade Environment.
<b>UnitIII</b>	Cloud Architecture, Services and Storage: Layered Cloud Architecture Design – NIST Cloud Computing Reference Architecture – Public, Private and Hybrid Clouds – IaaS – PaaS– SaaS – ArchitecturalDesign Challenges – Cloud Storage – Storage-as-a-Service – Advantages of Cloud Storage – Cloud Storage Providers – S3.
<b>UnitIV</b>	Cloud Resource Management : Inter Cloud Resource Management – Resource Provisioning and Resource Provisioning Methods – Global Exchange of Cloud Resources Cloud Security Mechanism: Encryption– Hashing– Digital signature– Public key Infrastructure – Identity and Access Management – single Sign – On(SSO) – Cloud – Based Security Groups – Hardened Virtual server Images.
<b>UnitV</b>	Working With Clouds : Cloud Delivery Models :The Cloud Provider Perspective: Building Iaas Environments – Equipping Paas Environments – Optimizing Saas Environments. Cloud Delivery Models :The Cloud Consumer Perspective : Working With Iaas Environments –Working WithPaas Environments – Working WithSaas Services.

<b>CO</b>	<b>CourseOutcomes</b>
CO1	Explain the core concepts of the cloud computing paradigm.
CO2	Outline the virtualization technology and determine their uses.
CO3	Apply the fundamental concepts in data centers to understand the tradeoffs in power, efficiency and cost.
CO4	Identify resource management fundamentals, i.e. resource abstraction, sharing and sandboxing and outline their role in managing infrastructure in cloud computing.
CO5	Analyze various cloud programming models and apply them to solve problems on the cloud.

<b>UnitI</b>	Introduction to Data Science – Evolution of Data Science – Data Science Roles – Stages in a Data Science Project – Applications of Data Science in various fields – Data Security Issues.
<b>UnitII</b>	Data Collection and Data Pre-Processing – Data Collection Strategies – Data Pre-Processing Overview – Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization.
<b>UnitIII</b>	Exploratory Data Analytics Descriptive Statistics – Mean, Standard Deviation, Skewness and Kurtosis – Box Plots – Pivot Table – Heat Map – Correlation Statistics – ANOVA.
<b>UnitIV</b>	Model Development Simple and Multiple Regression – Model Evaluation using Visualization – Residual Plot – Distribution Plot – Polynomial Regression and Pipelines – Measures for In-sample Evaluation – Prediction and Decision Making.
<b>UnitV</b>	Model Evaluation Generalization Error – Out-of-Sample Evaluation Metrics – Cross Validation – Overfitting – Under Fitting and Model Selection – Prediction by using Ridge Regression – Testing Multiple Parameters by using Grid Search.

UnitI	Introduction to Big Data Analytics – Data Analytics – Analytics Terminology – Types of Analytics – Analytics LifeCycle - DataStore – Getting Started with R – Data Exploration – Data Preparation
Unit II	Introduction to machine learning – Dimensionality reduction – Hardware Acceleration for Machine Learning and Big Data Analytics – Social Network Analytics. Descriptive analytics.
UnitIII	Market Basket Analysis – Kernel Density Estimation – Regression – Relational Logistics Regression – Relational Neighbor Classifiers – Bigraphs – Collective Inferencing.
UnitIV	Common predictive Modeling Techniques: RFM – Regression – Generalised Linear Models – Neural Network – Decision and Regression trees – Support vector Machines – Bayesian Methods Network Classification – Ensemble Methods.
UnitV	Segmentation and Hadoop – Cluster Analysis – Distance Measures – Evaluating Clustering – Number of Clusters – K-means Algorithm – Hierarchical Clustering – Introduction to Neural Networks – Support Vector Machines – K Nearest Neighbor classification – Ensemble learning. Hadoop concepts – Hadoop distributed filesystem (HDFS) basics.
